

IMPROVE SECOPS CONFIDENCE

Stellar Cyber delivers **high-speed high-fidelity threat detection across the entire attack surface**

Only Stellar Cyber dramatically improves SecOps analysts' confidence and productivity

Stellar Cyber leverages the tools and telemetry you trust by ingesting all SOC data into a single security operations platform, which integrates your existing tools with tightly integrated natively supported capabilities.

INTELLIGENT SOC

Turn an ordinary security analyst into a security expert

NG-SIEM

The smart, unified and cost-effective SIEM for all your security needs

NTA/NDR/AGING IDS REPLACEMENT

Detect unknown attacks at early stage from network traffic and firewall logs, and respond quickly

ASSET MANAGEMENT

Gain comprehensive visibility of all your assets and their risks through constant discovery from all data sources

VISIBILITY

Eliminate blind spots in detection coverage and have high confidence in your security tools

LOG MANAGEMENT/ COMPLIANCE

Aggregate, normalize, enrich analyze, store, search, visualize all your log data scalably and fast

Intelligent Next Gen Security Operations Platform

Powered by Open eXtended Detection & Response (XDR)

Visibility through normalized and enriched data from any source—Cloud, Endpoint, Network, Users, Application & SaaS

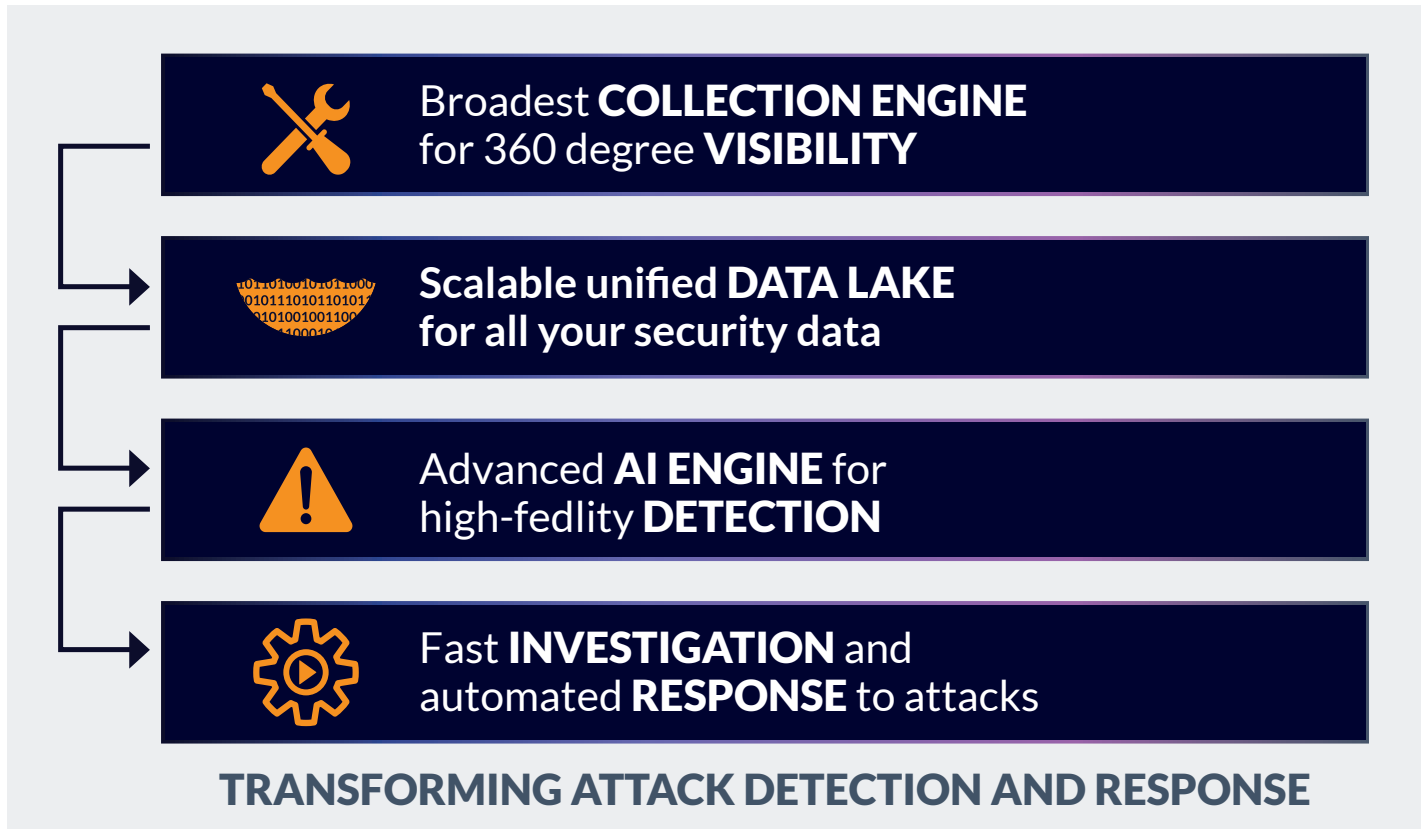

Visibility through tools and automatically respond—EDR, NDR, CASB, UEBA, SIEM, SOAR

Visibility through correlation—Single platform & single pane of glass for all incidents

THE FOUNDATION OF ANY NEXT GEN SOC

Open XDR

OPEN-XDR ECOSYSTEM

Stellar Cyber fuses data across all inputs, creating rich holistic context, ensuring every aspect of the attack surface is covered.
