

Drive New Security Revenue & Profits

Only Stellar Cyber delivers a single platform for SOC & MDR-as-a-Service

Services are the key to success as an MSP/MSSP, and now you can go beyond IDS-as-a-service or firewall-as-a-service with Stellar Cyber—intelligent next gen security operations platform—1st to be powered by Open-XDR

Stellar Cyber leverages the tools and telemetry you trust like a security blanket, wrapping it all together by ingesting all SOC data into a single security operations platform, which integrates your existing tools with tightly integrated natively supported capabilities.

- **Single license, pre-configured security operations platform deploys easily on premises, in public clouds or in your data center.**
- **Capital costs go down as you sunset stand-alone tools you no longer need.**

Central Visibility with Per Tenant Control in a Single Platform

- Multi-tenancy with granular Role-Based Access and Control (RBAC) makes for easy management of services for hundreds or thousands of end users.
- Wholesale managed services through partners or distributed control in multi-layer organizations.
- Security templates quickly on board new customers within one hour.

Improve Fidelity of Existing Investments

Open platform integrates all of the important tools and allows for customization to meet the needs of specific customers.

Single Platform, Single Pane of Glass to Respond

Stellar Cyber's platform approach streamlines anomaly detection and investigation by creating context among events—single platform and single pane of glass correlates attacks and respond to all incidents.

Multi-tenancy

Open

One Platform

Driving New Revenue

Become a trusted MSSP through high value and 'sticky' security services.

Compete more effectively by offering tailored and comprehensive suite of services.

Drive new revenues with SOC-as-a-service for mid-marketing customers.

Launch managed detection and response (MDR)-as-a-Service as a differentiator to enter strategic accounts.

Easily bundle services for SMBs by leveraging the tightly integrated natively supported capabilities like NDR, NG SIEM and UEBA.

Open API-s for integrating into your existing tools and end points.

Increase Service Margin

Achieve visibility across cloud, endpoint, network, user, application & SaaS.

Streamline anomaly detection and investigation by creating context among events with Stellar Cyber's patented Interflow™ technology.

Increase SOC productivity – streamline operational processes to a single console by consolidating alert triage, detection and response across your on-premises and cloud environments.

Eliminate the alert backlog with automated root cause analysis and timeline views, lowering the skill level required to evaluate and analyze alerts.

Gain insights into advanced threats – uncover malicious insiders, policy violations, external threats, ransomware, file-less and memory-only attacks and advanced zero-day malware.
