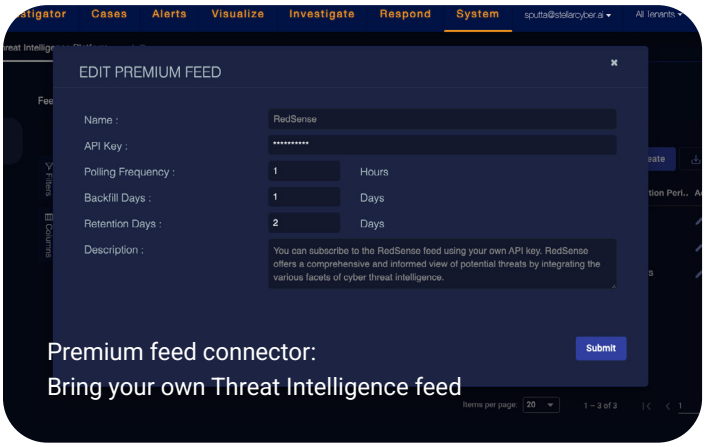
SOLUTION BRIEF

redsense
CYBER THREAT INTELLIGENCE

Stellar Cyber and RedSense

Enhance threat identification, improve the quality of alerts, and respond more effectively to cyber threats and incidents

Stellar Cyber Open XDR is a security operations platform that empowers lean security teams to take control of their operations. By combining NG-SIEM, NDR, UEBA, TIP, FIM, IDS, and intelligent automation, Stellar Cyber streamlines investigation workflows, reduces attacker dwell time, and boosts security analyst productivity. With the RedSense integration, organizations can enhance threat identification, see smarter alerts, and implement more actionable responses to cyber threats and incidents.



The RedSense integration augments the Stellar Cyber platform's comprehensive monitoring and threat detection capabilities with deeper insights into adversary infrastructure, infected systems, compromised credentials, and dark web activities. Stellar Cyber's proprietary threat detection engine, powered by Multi-layer AI™, automatically detects and correlates alerts, accelerating threat investigations and hunting. The integration augments these capabilities, ensuring that security teams can respond even more quickly incidents, further reducing risk and enhancing overall security effectiveness.

How It Works

For Stellar Cyber users, RedSense adds a proven understanding of adversaries (including their infrastructures, tools and tactics) and an understanding of an organization's people and network telemetry.

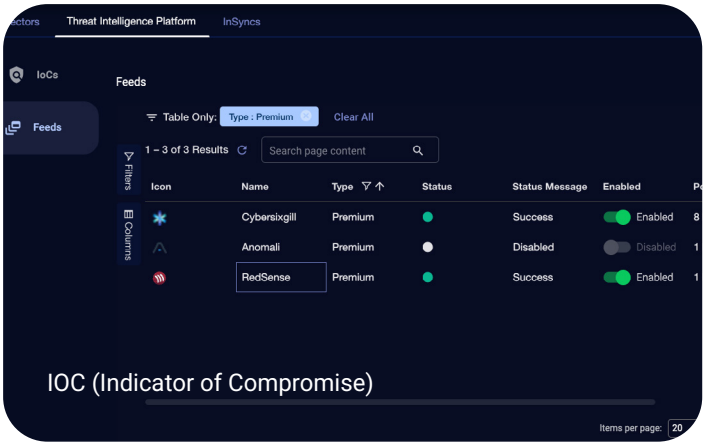
This integration delivers:

Better Threat Prioritization: RedSense helps organizations focus on the most critical threats, ensuring that resources are allocated effectively.

Smarter Alerts: Enriched with RedSense's intelligence, alerts are more informed and actionable, reducing noise and false positives and enabling faster decisions.

More Accurate Incident Response: Greater precision in mitigating incidents, minimizing the time and effort required to neutralize threats.

Overall, this integration enables organizations to improve their security operations with a more comprehensive view of their security landscape, adding critical insights from RedSense to the advanced detection and response capabilities of Stellar Cyber.



Stellar Cyber's Automation-driven Security Operations Platform, including NG-SIEM and NDR and powered by Open XDR, delivers comprehensive, unified cybersecurity without complexity. It empowers lean security teams of any skill level to successfully secure their environments. As part of this unified platform, Stellar Cyber's Multi-Layer AI™ enables enterprises, MSSPs, and MSPs to reduce risk with early and precise threat identification and remediation while slashing costs, retaining investments in existing tools, and improving analyst productivity. This results in a 20X improvement in MTTD and an 8X improvement in MTTR. The company is based in Silicon Valley. For more information, visit https://stellarcyber.ai.
